EDUCATION

Drexel University

Philadelphia, PA

Bachelor of Science in Computer Science, Minor in Mathematics

June 2026

Coursework *Systems Programming, System Architecture, Data Structures & Algorithms*

Honors *Outstanding Undergraduate Student Award 2024, Upsilon Pi Epsilon 2025,*

CCI Industry Mentorship Program (Comcast) 2026

EXPERIENCE

The Triangle

Philadelphia, PA

Web Director

June 2023 - Present

- Rebuilt the entire frontend of www.thetriangle.org, migrating from a monolithic WordPress architecture to a headless CMS with a custom Astro frontend, increasing pageviews by over 500% through substantially improved SEO and page performance
- Engineered custom PHP REST endpoints with caching and pagination to power the new frontend, improving page speed and maintainability
- Served as sole on-call engineer for production incidents, troubleshooting and restoring site availability across hosting, CMS, and frontend layers

Susquehanna International Group

Bala Cynwyd

Software Engineer - Production Trading Systems

September 2024 - March 2025

- Architected Python applications to remotely download, transfer, compress, and delete log files across 3,000+ Linux and Windows hosts
- Led a major refactor of a large-scale network connectivity system, migrating from Python 2.7 to Python 3.10, improving performance, readability, and maintainability by 200% while eliminating long-standing defects
- Developed, debugged, and enhanced Python 3.10 services that performed daily, mission-critical “ready-for-business” checks, improving system reliability and operational confidence

Software Engineer - Energy

September 2023 - September 2024

- Built, maintained, and enhanced 150+ production data feeds (5-minute, hourly, and daily) ingesting data from 20+ external sources as part of a large-scale ETL pipeline
- Designed a configurable job-transfer system for automated data-scraping workflows, using Python and SQLAlchemy to migrate, reconfigure, and persist job metadata across hosts and environments
- Developed and refined 30+ data-quality alerts to detect stale, missing, or invalid data, improving data reliability and reducing downstream failures

Lyquix

Philadelphia, PA

Full-Stack Developer

September 2022 - September 2023

- Built and shipped 8 responsive WordPress websites using PHP, JavaScript, and modern front end tooling, closely following Figma designs
- Modernized a legacy WordPress theme by introducing Vue.js + TypeScript, improving code structure and enabling reusable UI components

PROJECTS

MAVERICK | C#, .NET 8

September 2025 – Present

- Leading a 6-person senior engineering team, running weekly standups and translating stakeholder design requirements into technical deliverables
- Architecting a C# .NET 8 socket server supporting TCP and RS-232 connections to simulate communication with 11 distinct AV devices, enabling software validation without physical hardware
- Developing a configurable C# .NET 8 code-tracing engine that accepts user-defined inputs and traces execution through Pershing’s proprietary framework to evaluate logic flow and outputs

TECHNICAL SKILLS

Languages: Python, Typescript, Java, C#, C/C++, PHP, SQL, JavaScript

Frameworks: Astro, Wordpress, React, Node.js, Flask

Developer Tools: Git, Docker
