EDUCATION

Drexel University

Philadelphia, PA

Bachelor of Science, Major in Computer Science, Minor in Mathematics

Sept 2021 - June 2026

Coursework: Data Structures, Machine Learning, Algorithms and Analysis, Systems Programming

GPA: 3.77

Honors: Outstanding Undergraduate Student Award 2024, Upsilon Pi Epsilon 2025

SKILLS

Programming Languages Python | C | C++ | Java | SQL | PHP | TypeScript | C#

Frameworks React.js | Vue | Astro | Express.js | Flask | Wordpress

RELEVANT EXPERIENCE

Susquehanna International Group

Sept 2024 - March 2025

Software Developer | Proprietary Trading Systems Development

Bala Cynwyd, PA

- Produced applications for managing 100+ log files and background processes across over 3000 remote hosts, regardless of operating systems
- Refactored legacy code to improve speed and maintainability of large environment testing applications by 200%
- Maintained suite of over 35 complex alerts and ready for business checks to ensure trading systems were fully operational

Susquehanna International Group

Sept 2023 - Sept 2024

Software Developer | Energy

Bala Cynwyd, PA

- Designed a transfer system to move configurable automated data-scraping jobs between hosts and environments
- Monitored over 150 hourly, daily, and weekly data feeds to check for and fix missing, stale, or incorrect data
- Partnered with traders to refine and adjust existing scripts, leading to reductions in trade execution time and improvements in strategy performance

Lyquix

Sept 2022 - Sept 2023

Junior Web Developer

Philadelphia, PA

- Implemented responsive WordPress sites from designer specifications, translating Figma layouts into custom themes and reusable components
- Refactored the company's core theme to integrate Vue.js, improving frontend performance, modularity, and maintainability
- Contributed in an Agile workflow, supporting sprint planning, code reviews, and iterative feature delivery

PROJECTS

MAVERICK

Sept 2025 - Present

Project Lead

Philadelphia, PA

- Build a Windows-based socket server that simulates AV devices over TCP, allowing Pershing to validate Crestron C# logic without physical hardware
- Implement a code-tracing engine that parses JSON events and analyzes C pillar modules to produce stack-trace reports and verify logic flow
- Deliver a virtual testing suite with multi-client concurrency, per-device protocol simulation, and strict command validation to streamline developer debugging

Kanoodle Solver

June 2023 - Sept 2023

- Developed a complete Python solver for Kanoodle, a 3D logic puzzle with 12 uniquely shaped pieces arranged on a 5x11 grid
- Designed an ANSI-color, continuously updating terminal interface that accurately replicates the physical game layout
- Implemented an exhaustive search algorithm capable of enumerating all valid solutions to a given puzzle configuration and detecting unsolvable states.

OTHER EXPERIENCE

The Triangle, Drexel's Student Newspaper | Information Technology Director

Sept 2023 - Present

Drexel College of Computing & Informatics | Operations Assistant

July 2022 - Present
